Decline in Use of Monetary Bond

Use of Monetary Bond

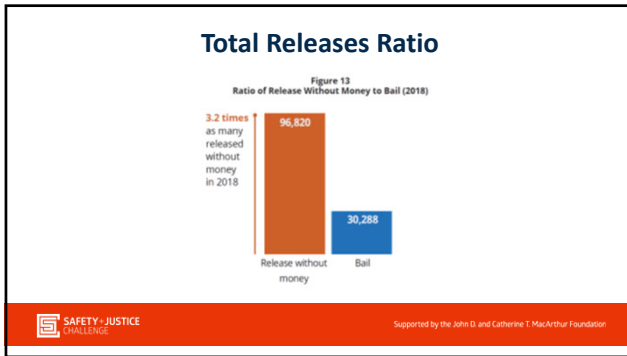

43% in 1987

48% in 1990

23% in 2018

Supported by the John D. and Catherine T. MacArthur Foundation

Interactive Exercise 1:

Identify a strategy or initiative that can be incorporated in your jurisdiction.

- What kind of programming or resources would need to be in place to make it effective?
- How soon in the case process (i.e. arrest, arraignment, etc.) can this strategy be employed to have the greatest impact on jail reduction?

Interactive Exercise 2:

Please consider which stakeholders/practitioners need to be present for the planning and implementation of such an initiative.

- What resources would need to be available?
- How can you or your agency bring different stakeholders together?
- What challenges do you anticipate? And how can you confront them?
